Why did we Build the Marketer of the future Framework?

The Marketer of the Future transforms Abbott EPD marketing from **humans using AI** tools to **AI-empowered strategic orchestrators** by:

- Redesigning how we work
- Developing what we can do
- Engineering how we lead, and govern transformation
- Deploying five integrated intelligence agents

- creating a **human-AI partnership** where marketers achieve outcomes neither could accomplish alone

We started by mapping today's reality for the marketers

Marketers often function as tactical executors rather than strategic leaders, constrained by manual workflows and reactive approaches that limit their potential business impact.

1 PLANNING

- Static insights from fragmented data sources
- Resource-intensive workshops spanning 2-3 months
- Annual brand plans with limited adaptability

- Brand Plans
- TA plans
- Market Researches

2 DEVELOPMENT

- Manual inconsistent creative briefs
- Agency-dependent, high cost, long lead times
- Intuition-based judgment on developed elements
- Limited localization

- Creative Brief
- Creative Board
- Brand Books

3 EXECUTION

- Linear campaign rollouts
- Manual coordination
- MLR reviews slow cycles
- Campaigns are largely "one-size-fits-all"
- Asset-based rather than customer journey-based execution

- Assets Library
- MLR approval

4 MEASUREMENT

- Reliance on lagging indicators (sales, recall)
- Broad segments assessment
- Siloed Data
- Quantitative-based measurement
- Limited real-time testing capabilities

- Insights Dashboard
- Engagement Dashboard

5 OPTIMIZATION

- Post-campaign analysis with limited actionability
- Missed personalization opportunities lead to missed optimization options
- Underperforming or overperforming segments are not optimized for success

- Customer Feedback
- Local Affiliates Feedback

This revealed five systemic gaps blocking the future

Diagnostic patterns identified across the organization that prevent scalability.

GAP 01

Fragmentation

Data, tools, and teams operate in silos with no single source of truth.

SYSTEM IMPACT
Disconnected insights

GAP 02

Reactive Mode

Planning is static and annual; unable to pivot quickly to market signals.

SYSTEM IMPACT
Missed opportunities

GAP 03

Bottlenecks

Manual production and review cycles create severe delays in output.

SYSTEM IMPACT
Slow speed-to-market

GAP 04

Mass Reach

One-size-fits-all content due to inability to scale variations.

SYSTEM IMPACT
Low engagement

GAP 05

Compliance Friction

MLR is viewed as a gatekeeper rather than an integrated enabler.

SYSTEM IMPACT
Operational drag

… Mapping the AI-empowered Human-led Marketer of the future

5 purpose-led AI agents each own a critical marketing function — designed to operate independently yet amplify each other across the entire product lifecycle

ALICE

Creative Excellence

AI-Led Intelligent Creative Engine

Optimizes briefs, scores concepts against effectiveness benchmarks, and generates persona-targeted creative — accelerating the path from insight to high-impact content.

BRANDS

Brand Strategy

Brand Strategy Planning System

Builds the global brand plan, regionalizes it for local markets, assesses alignment, navigates market archetypes, and deploys tactical execution at scale.

CRAFTS

Content Excellence

Content Lifecycle Management Agent

Conceives content strategy, renders modular assets, annotates with metadata, finalizes through MLR review, sells to HCPs, and tests before mass go-live.

SPARK

Customer Engagement

Intelligent Customer Engagement Agent

Segments audiences, prioritizes high-value targets, activates optimal channels, routes personalized journeys, and kindles ongoing engagement loops.

ACCESS

Market Access

AI-Powered Market Access Agent

Analyzes competition, builds value dossiers, engages assessment bodies, simulates economic models, and supports patient programs.
